Cleaning During An Outbreak

1. **Disinfect**
   - Apply approved chemical at proper concentration and contact time per label.
   - Rinse after if required by label.
   - Kills germs

   **Does surface come in contact with food, hands, mouths, eyes, or noses?**
   - Examples: tabletops, toys, sleeping mats, high chairs, etc.

   **Yes. Proceed**

   **No. Finished**

2. **Wash**
   - Use soap and water
   - Removes high concentration of disinfectant

3. **Rinse**
   - Clean water
   - Removes soap which interacts with sanitizer in the next step

4. **Sanitize**
   - Apply approved chemical at the proper concentration and contact time per label

**Bleach Outbreak Disinfectant**
Note: Other chemical disinfectants may be used. Seek health inspector approval prior to use.
