Follow regular Return to School illness policies if all symptoms have resolved or are improving. Adhere to appropriate masking and other mitigation measures.

Follow Home Isolation for 10 days following symptom onset and 24 hours fever free without use of fever-reducing meds.

STOP

• Only use this tool for students and staff that DO NOT have a known COVID-19 exposure within 14 days.
• Any symptomatic individuals should isolate when symptoms begin and pursue evaluation, including testing as soon as possible. If symptoms develop at school and point of care testing is available, testing may be performed following an initial assessment using CDPHE’s Addressing Symptoms at School tool.
• Anyone who tests positive using any viral diagnostic test type (not antibody tests) should be treated as a case and should isolate. No additional test results can end isolation early for a symptomatic positive person.
• Symptomatic individuals within 90 days of a previous positive viral diagnostic test (not antibody test) and those who are fully vaccinated (2 weeks after final dose) should isolate, be investigated for potential infection in consultation with public health and/or a healthcare provider, and may require testing prior to return to school.

Have symptoms resolved within 24 hours of symptom onset?

YES

NO

Did the person have Minor symptoms only AND symptoms resolved within 48 hours?

YES

NO

Was testing done?

Test result

Negative

Positive

What test type was used?

PCR or Molecular

Antigen

Was negative antigen test confirmed with a negative PCR or molecular test?

Or, is the individual participating in weekly serial testing and will continue to participate for at least 2 additional weeks?

YES

NO

Reminder
• Unchanged, usual symptoms of a known chronic condition should not prompt exclusion

Major Symptoms
• New or worsening cough
• Shortness of breath or difficulty breathing
• Loss of taste or smell

Minor Symptoms
• Feeling feverish, having chills, temperature of 100.4˚F or greater
• Sore throat
• Runny nose or congestion
• Muscle or body aches
• Headache
• Fatigue
• Nausea or vomiting
• Diarrhea
